

Windows Mail

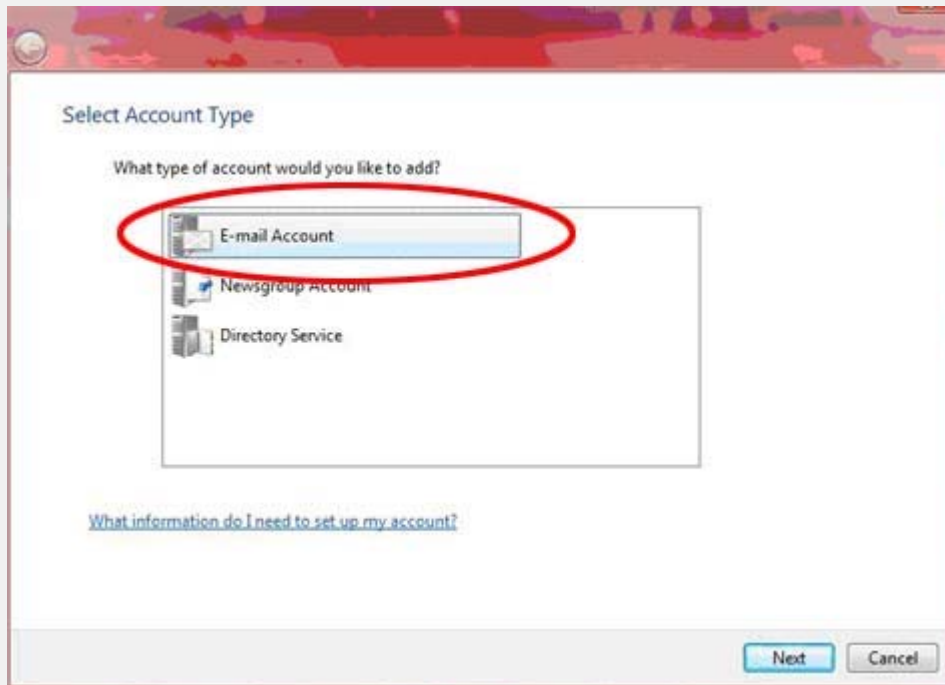

1) Open windows mail. Click **Tools** and then **Accounts**.

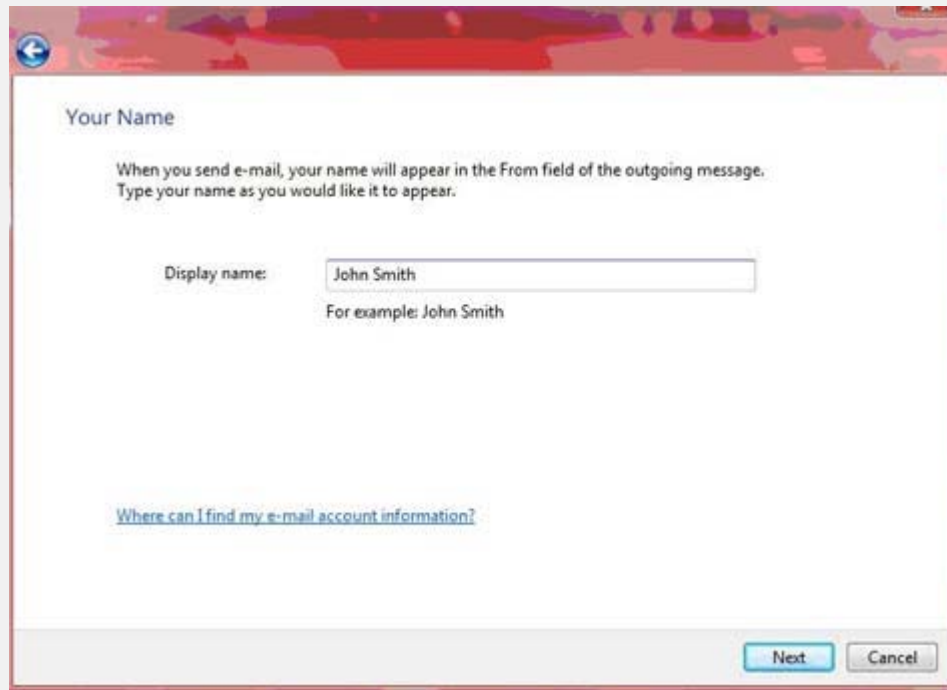

2) When the Internet Accounts window opens, click on **Add**.

3) Highlight **Email Account** by clicking once on it. Then click **Next**.

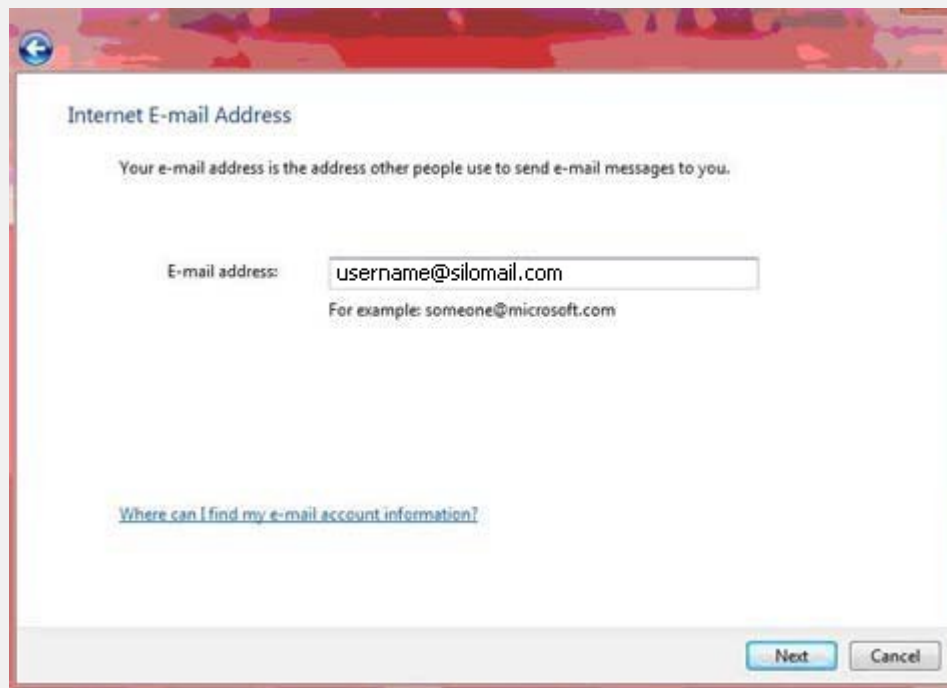

4) In the **Display name** field, enter the name that you would like to appear when sending emails. Then click **Next**.

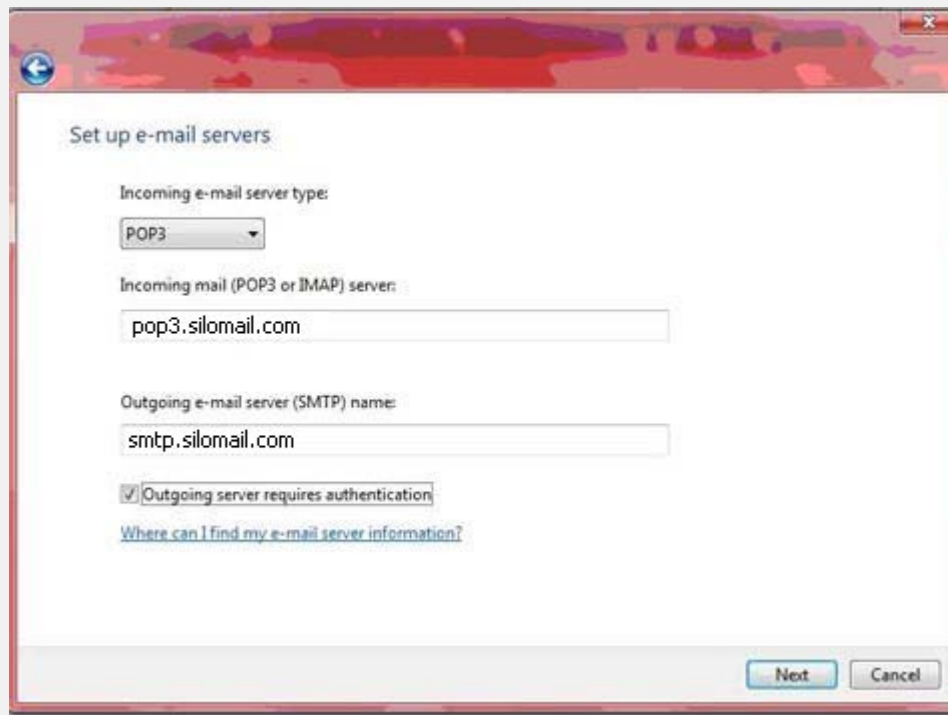

The screenshot shows a window titled "Your Name" with a back arrow icon in the top-left corner. The main text reads: "When you send e-mail, your name will appear in the From field of the outgoing message. Type your name as you would like it to appear." Below this is a text input field labeled "Display name:" containing the text "John Smith". Underneath the field is the text "For example: John Smith". At the bottom left, there is a blue hyperlink: "Where can I find my e-mail account information?". At the bottom right, there are two buttons: "Next" (highlighted in blue) and "Cancel".

5) In the **Email address** field, enter your entire email address. For example, if your email address is username@silomail.com enter username@silomail.com
Click **Next**.

The screenshot shows a window titled "Internet E-mail Address" with a back arrow icon in the top-left corner. The main text reads: "Your e-mail address is the address other people use to send e-mail messages to you." Below this is a text input field labeled "E-mail address:" containing the text "username@silomail.com". Underneath the field is the text "For example: someone@microsoft.com". At the bottom left, there is a blue hyperlink: "Where can I find my e-mail account information?". At the bottom right, there are two buttons: "Next" (highlighted in blue) and "Cancel".

- 6) In the **incoming mail server**, enter **pop3.silomail.com** . In the **Outgoing email server** enter **smtp.silomail.com** . Check **Outgoing Server Requires Authentication**. Click **Next**.
