

Setting Up Silomail Using MacMail.

Step 1. Open the **Apple Mail** application.

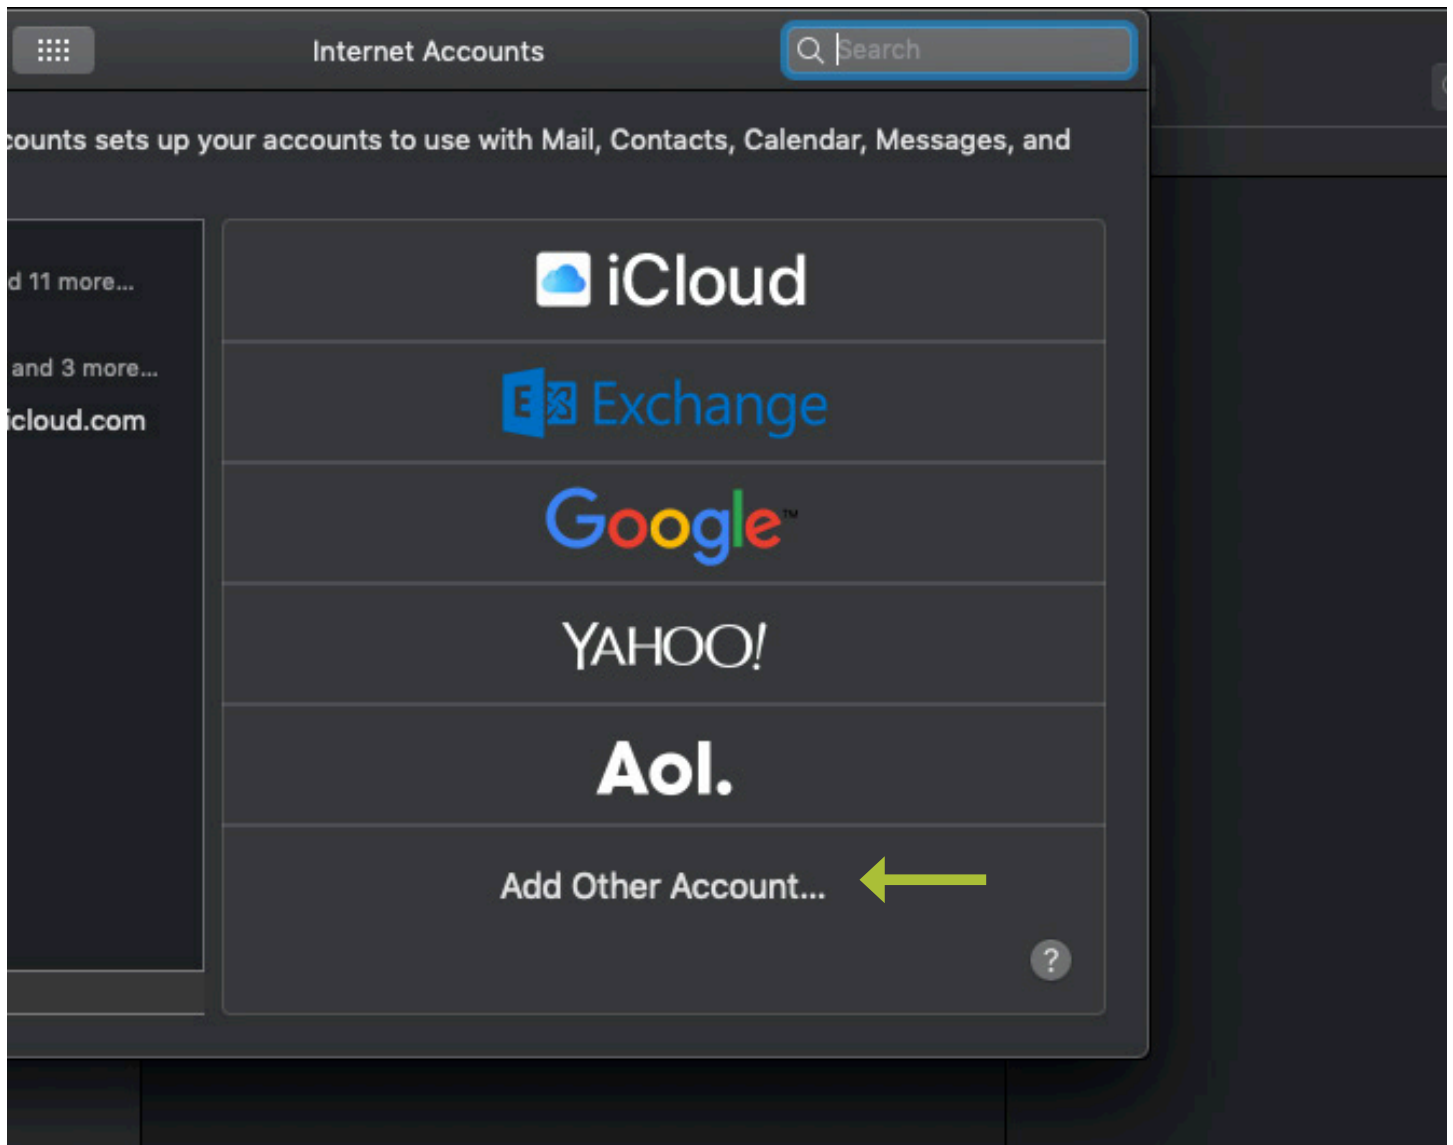

Step 2. In the top left corner click **Mail** and then select **Add Account**.

Setting Up Silomail Using MacMail.

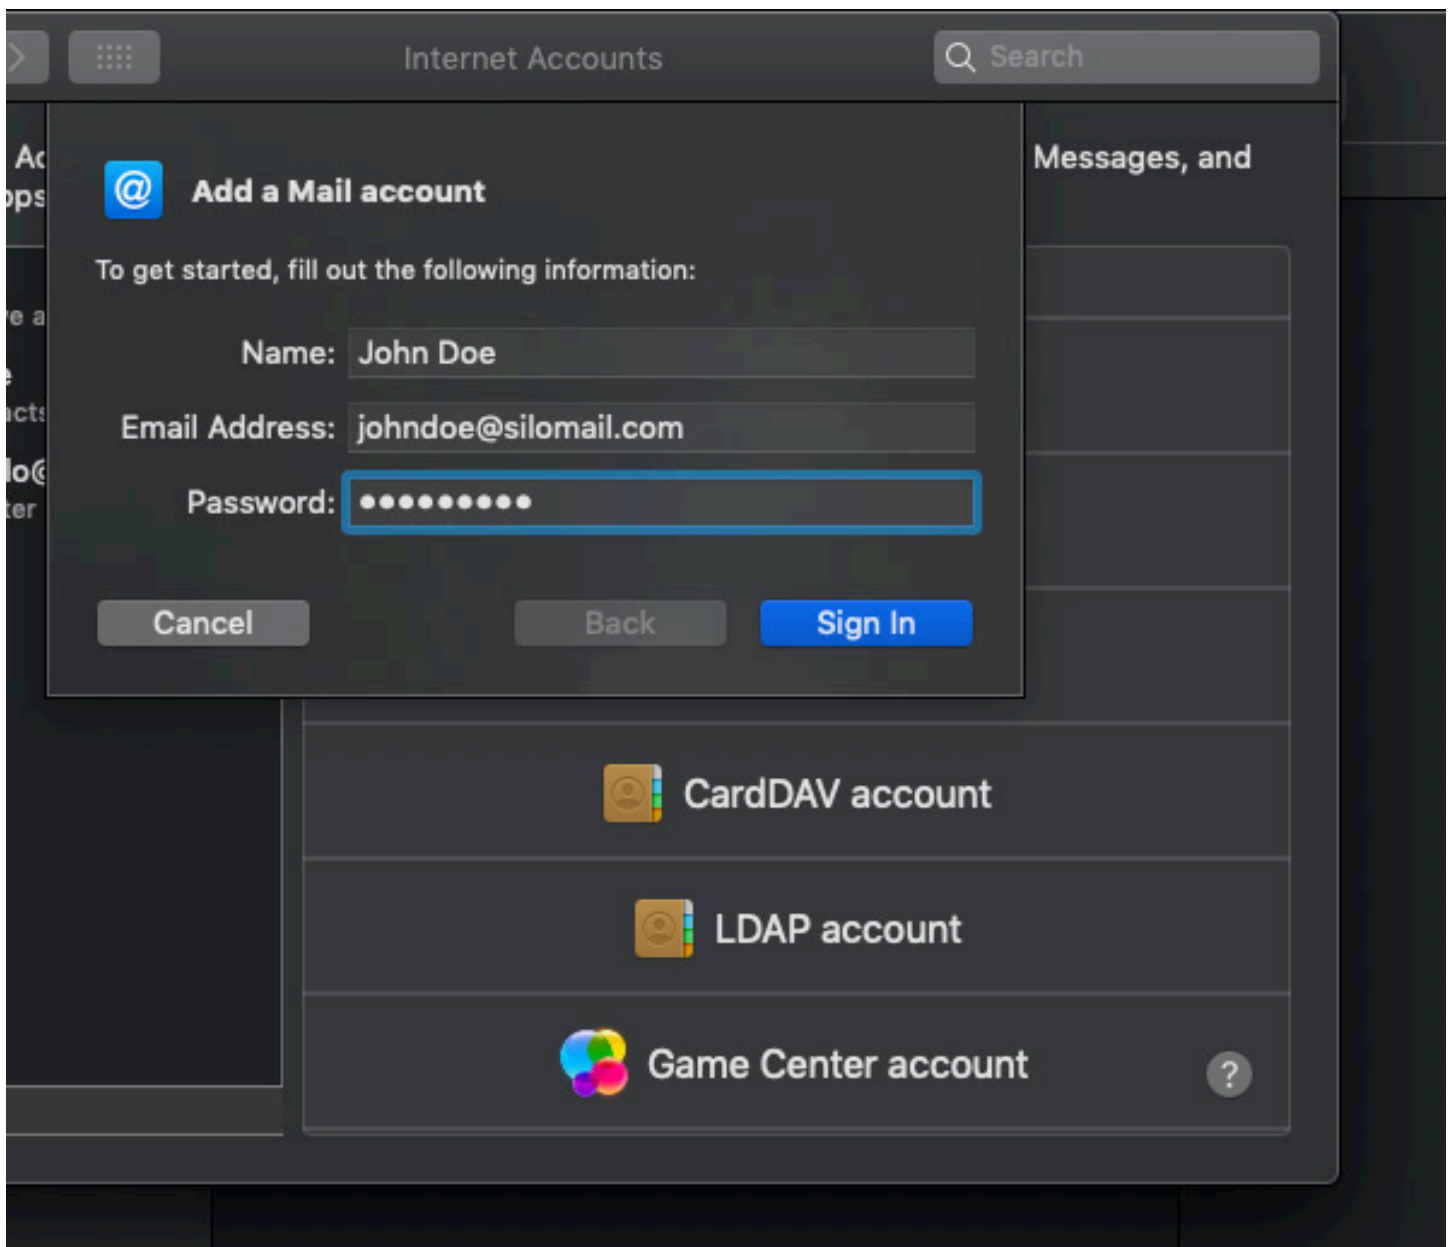

Step 3. Click **Other Mail Account** as seen in the image below.

Setting Up Silomail Using MacMail.

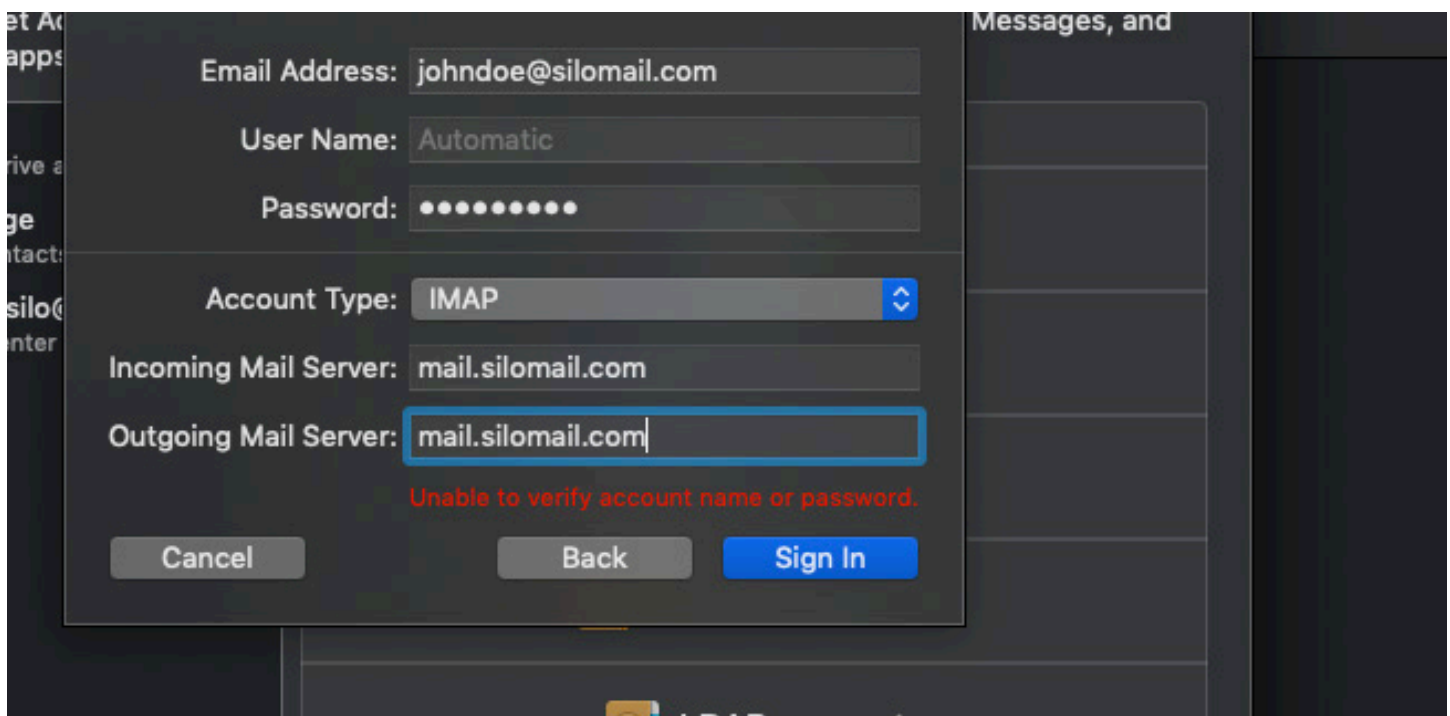

Step 4. Enter your name, email address, and password as shown in the image below. Click **Sign In**.

Setting Up Silomail Using MacMail.

Step 6. If it doesn't instantly complete it will likely give an error message that says "Unable to verify account name or password" and will allow you to add additional information including **Account Type**, **Incoming Mail Server**, and **Outgoing Mail Server**. Fill in this information as per the image below.

Step 7. Click **Done** and your email is now set up! If you have any emails they should shortly start flowing into your inbox.
